

TURNKEY VENTILATION SYSTEM

An optimal ventilation system ensuring energy efficiency as well as air quality and control all in compliance with the rules and regulation in effect

Ventilation System

- Effective design of:
 - Surface and underground installation and supply
 - Supply and installation of the temporary or permanent heating system
- Mechanical and electrical engineering as well as programming
- Construction, installation and commissioning
- Installation of a specialized automated or manual system for mercaptan gas

Advantages

- Costs and models can be customized to your project
- VOD (Ventilation on Demand) including an automated management system
- Energy saving
- Mechanized shutters
- Optimizes the work schedule
